

## Exhibit 27 - Flood Plain Elevation Plan

The site grades range from +/- 10' to elevation +/- 7' across the 35 acres. The current Preliminary D-Firm Maps show the base flood elevation of 12.00'. The City of Slidell ordinance requires that the structures within Flood Zone A have a minimum elevation of 1' plus Base Flood Elevation. Therefore, the minimum FFE for this site is elevation 13.00'. This elevation can be accomplished by either bringing in fill material beneath the building or by supporting the structure on piles or piers.
