1.0 Executive Summary

The scope of services for this Phase I Environmental Site Assessment (ESA) included the requirements set forth in American Society for Testing and Materials (ASTM) Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and Title 40 of the Code of Federal Regulations, Part 312 (40 CFR 312). The subject property assessed for this Phase I ESA is a 44.42-acre Tract on Jefferson Parkway in Pine Bluff, Arkansas.

The subject property assessed for this Phase I ESA was a 44.42-acre Tract on Jefferson Parkway in White Hall, Arkansas. The property is currently undeveloped woodland that is not being utilized. The only structures on the property are electrical transmission lines on the eastern section of the property. The northern adjoining property is an industrial plant (Highland Pellets), to the east are three commercial properties (Stant US Corporation, Flint Group, Mauser Packaging solutions), and to the southwest is an industrial plant (Wheeling Machine Products).

The property is owned and being marketed for sale by the Economic Development Alliance for Jefferson County, Arkansas (The Alliance). Significant findings include:

- MCE contacted Ms. Lou Ann Nisbett who acts as user with The Alliance. She was unaware of any environmental issues associated with the subject properties.
- MCE contacted Ms. Nancy Lee McNew, owner of the property with The Alliance. She was unaware of any environmental issues associated with the subject properties.
- Fifteen standard environmental records were listed by the Environmental Data Resources, Inc. (EDR). Of the fifteen records, two were potentially indicative of a Recognized Environmental Condition (REC).
 - 0.295 miles east north-east of the subject property was reported as a SWID. Upon investigation, there was no evidence found to support the claim. It is the opinion of MCE that this site would not constitute as a REC.
 - 0.3566 miles west of the subject property was reposted as a LTANKS. A small leak was observed in the fuel lines and was replaced. A LUST case was not opened by ADEQ and ADEQ's records could not provide additional information on the site. It is the opinion of MCE that this site would not constitute as a REC.
- Historical aerial photographs indicate the area has been rural woodland as far back as the 1930s. Development began along Arkansas Highway 65 although it was primarily residential. In the mid-1970's commercial and industrial buildings were developed on the properties adjoining the subject property.
- The data gaps in historical topographic maps were determined not to be significant by the environmental professionals at MCE due to sufficient historical information and professional knowledge of the subject property and vicinity.

It is the opinion of the environmental professionals at MCE, that NO REC was identified in regard to the subject property.

Observations should be made during site modifications for areas of possible contamination, such as but not limited to, the presence of underground facilities, buried debris, stained soil, or odorous soil. Should such materials be encountered, further investigation and analysis may be necessary at that time.

2.0 Introduction

McClelland Consulting Engineers, Inc. (MCE) performed a Phase I Environmental Site Assessment (ESA) as follows:

Subject Property: The subject property contains approximately 44.42-acres and is part of the SW quarter Section 23, Township 5 South, Range 10 West, 5th Principle Meridian (P.M.) in Pine Bluff, Arkansas.

Client: Economic Development Alliance for Jefferson County (The Alliance)

Executed Contract: Ms. Lou Ann Nisbett

Receipt Date: August 8, 2019

2.1 Purpose

The purpose of this Phase I ESA was to conduct an All Appropriate Inquiry (AAI) to assist the owner in satisfying the requirements to qualify for the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) landowner liability protections, except for the User's Responsibilities, which are limited to the User Provided Information found in *Section 4.0*. If the information in section 4.0 is not provided to MCE, then it is the responsibility of The Alliance to collect and assess this information in order to fully qualify for the landowner liability protections and to have conducted AAI.

In addition, this Phase I ESA was conducted to identify recognized environmental conditions (REC) in connection with the subject property in accordance with the American Society for Testing and Materials (ASTM) Practice E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This Phase I ESA is not intended to meet CERCLA requirements other than AAI or to address any state or local laws or any federal requirements other than AAI.

2.2 Scope of Services

The scope of services for this Phase I ESA included the requirements set forth in ASTM E1527-13 and Title 40 of the Code of Federal Regulations, Part 312 (40 CFR 312) and our proposal dated August 8, 2019.

2.3 Significant Assumptions

No assumptions were made by The Alliance, or MCE.

2.4 Limitations and Exceptions

The accuracy of this assessment is limited to evidence detected through visual and olfactory senses on the specific day physical inspection was conducted. MCE excludes possible evidence of environmental impacts that were obscured by existing vegetation, structures, or water from being detected. Accuracy is also limited to the availability and correctness of certain public information, which was readily obtained during the course of the investigation. MCE does not warrant or guarantee the property suitable for any particular purpose or certify it as completely free of environmentally detrimental contamination. Nor does MCE warrant or guarantee information provided by vendors or subcontractors. Future regulatory modifications, agency interpretations, and/or attitude changes may affect the environmental status of the property described herein.

2.5 Special Terms and Conditions

No special terms or conditions were employed for this Phase I ESA.

2.6 User Reliance

MCE has performed this scope of services for the exclusive use of, and the reports can be relied upon by Economic Development Alliance for Jefferson County (The Alliance), their lending institution, and their attorneys. Any use by entities not listed is expressly prohibited without prior written permission from MCE.

3.0 Site Description

The subject property description is based on information obtained by MCE observations made during the site reconnaissance and from reasonably ascertainable, publicly available, practically reviewable published references.

3.1 Location and Legal Description

Site Address: The subject property is located on Jefferson Parkway in Pine Bluff, Arkansas.
(Parcel Number: 0931-83649-00)

Size of Subject Property: Approximately 44.42-acres

Legal Description: The subject property contains approximately 44.42-acres and is part of the SW quarter Section 23, Township 5 South, Range 10 West, 5th Principle Meridian (P.M.) in Pine Bluff, Arkansas.

3.2 Site and Vicinity General Characteristics

The general area can be characterized as suburban timberland. The subject property consists of mixed hardwoods and pine with heavy underbrush. The site is bordered to the north by Jefferson Parkway and on the south by a spur railroad.

3.3 Current Use of Property

The subject property is currently an undeveloped tract in the Industrial Park. The site is surrounded by industrial facilities including packaging, automotive manufacturing, oil field products, metal fabrication, transformer manufacturing, pellet mill, and Pine Bluff Arsenal.

3.4 Descriptions of Structures, Roads, and Other Onsite Improvements on the Site

The subject property is mostly undeveloped with no onsite structures. The eastern section of the site has electric utility lines erected trending northwest to southeast through the property.

3.5 Current Uses of Adjoining Properties

North: Jefferson Parkway and Highland Pellet Factory beyond.
East: Stant US Corporation and Flint Group.
South: Mauser Packaging Solutions.
West: Wheeling Machine Products.

4.0 User Provided Information

Pursuant to ASTM E 1527-05, MCE requested the following information from the user.

Table 1. User provided information summary.

	Item	Provided	Not Provided	Not Applicable
4.1	Historical Environmental Questionnaire	X		
4.2	Title Records		X	
4.3	Environmental Liens or Use Limitations		X	
4.4	Specialized Knowledge		X	
4.5	Commonly Known or Information		X	
4.6	Valuation Reduction			X
4.7	Identification of Site Manager/Owner	X		
4.8	Reason for Phase I ESA	X		
4.9	Prior Environmental Reports		X	

4.1 Historical Use Questionnaire

Ms. Nancy Lee McNew with The Alliance completed the User questionnaire for the subject property. See Appendix 3 - Interviews and Correspondence to reference completed Questionnaires.

4.2 Title Records and Survey

A Title Record was not provided by The Alliance.

4.3 Environmental Liens or Use Limitations

Environmental Liens or use limitations were not included as part of the scope. The EP deemed this information would not have provided any relevant information based on the history and current uses of the site.

4.4 Specialized Knowledge

The owner did not provide any information regarding specialized knowledge relevant to a REC in association with the subject properties.

4.5 Commonly Known or Reasonably Ascertainable Information

The Alliance did not provide any information regarding commonly known or reasonably ascertainable information within the local community relevant to a REC in association with the subject property.

4.6 Valuation Reduction for Environmental Issues

Valuation of the sale price was not required.

4.7 Owner, Property Manager, and Occupant Information

The subject property is currently owned by The Alliance. The subject property is unoccupied, unutilized, and undeveloped.

4.8 Reason for Performing Phase I

Ms. Nancy Lee McNew with The Alliance indicated that the Phase I ESA is being conducted as due diligence for a future sale of the property.

4.9 Prior Environmental Reports

No prior environmental reports were made available for the subject property.

5.0 Records Review

The records review is based on information received from The Alliance and from reasonably ascertainable, publicly available, practically reviewable information sources.

5.1 Standard and Additional Environmental Record Sources

The regulatory review included the acquisition of lists of regulated facilities at the federal and state levels that occur within the minimum search distances set by ASTM & AAI. Environmental Data Resources, Inc. (EDR) prepared a database search. A copy of their complete report is provided in Appendix 2.

Table 2. Summary of listed regulatory records.

Database	ASTM/AAI Search Distance (miles)*	Target Property	≤ 0.125-mile	0.125 – 0.25	0.25 – 0.5	0.5 – 1.0	> 1.0-mile	Total

5.2 Local Records

MCE submitted a questionnaire on August 19, 2019 which requested information from the Pine Bluff Fire Department database files. MCE has not received a response from the Pine Bluff Fire Department as of the date of this report.

5.3 Physical Setting Sources

Topography

On the USGS topographic map White Hall, AR 7.5-minute Quadrangle (2017), elevations on the subject property appear to range from approximately 225 to 250 feet above mean sea level. The subject property appears to drain primarily to the northeast towards Caney Bayou. A copy of the current Topographic Map can be found in Appendix 1.

Geology

The surface geology in the immediate vicinity of the project site is mapped as Quaternary Terrace deposits and Tertiary Jackson Group. Terrace deposits include a complex sequence of unconsolidated gravels, sandy gravels, sands, silty sands, silts, clayey silts, and clays. The individual deposits are often lenticular and discontinuous. At least three terrace levels are recognized with the lowest being the youngest. Fossils are rare. The lower contact is unconformable and the thickness is variable. The Jackson Group is divided into two distinct units in Arkansas: a

lower marine unit called the White Bluff Formation and an overlying non-marine unit called the Redfield Formation. The blue-gray to off-white White Bluff Formation has three dominate facies: an argillaceous sand containing glauconite and rich in molluscan fossils, a calcareous glauconitic clay with common invertebrate fossils, and a blocky clay with some silt and a trace of sand and invertebrate (mostly molluscan) molds. The Redfield Formation is typically a sequence of light-gray, thinly laminated silts, silty clays, and silty sands. Cross bedded sands and minor lignite beds are present in the Redfield Formation with plant remains being locally abundant. A minor disconformity occurs at the base of the Jackson Group sequence. Original reference: T. A. Conrad, 1856, Philadelphia Academy of Natural Science Proceedings, v. 7, p. 257-258; E. W. Hilgard, 1860, Rept. Geology and Agriculture Mississippi.

Soils

The following soil type exists in the project area according to SSURGO soils map:

- Calloway-Urban land complex

Table 3. Soil descriptions

Soil Type	Description
Calloway-Urban land complex	Calloway-urban land complex has slopes from 1 to 3 percent, depth to restrictive feature: 33 to 41 inches to fragipan. Natural drainage is somewhat poor with runoff low. These soils are fine-grained soils, silts, and clays.

FEMA Flood Insurance Map

FEMA's National Flood Hazard Layer indicates the subject properties are not located within the AE Zone of the floodplain. A portion of the Flood Plain Map (05069C0165D) with the project site shown is included in Appendix 1.

State/Federal Water Well Databases

The Federal USGS Well Information database indicates there are no active water wells within one mile of the subject site.

5.4 Historical Use Information

Based on a review of historical aerial photographs, historical topographic maps, and interviews with locals, it appears that the subject properties have been rural/wooded land for at least 80 years.

5.5 Standard Historical Sources

Aerial Photographs

Aerial photographs for the subject properties were obtained from EDR. Copies of the aerial photographs are included in Appendix 4. A review of aerial photography is summarized in *Table 4*.

Table 4. Summary of aerial photographs

Year	Subject Property	Adjoining Properties
1949	In 1949, the subject property appears to be a rural tract possibly being used for timber.	In 1949, the surrounding area appears to be rural with few residences. Most of the area appears to be timber.
1968	Since 1949, no apparent change was evident on the subject properties.	Since 1949, Jefferson Parkway was constructed on the north side of the site. It appears that some timber harvesting has occurred, but no buildings are present.
1971	Since 1968, no apparent change was evident on the subject properties.	Since 1968, one new building was constructed southeast of the subject property. No evidence of change is apparent to the adjoining properties.
1983	Since 1976, no apparent change was evident on the subject properties.	Since 1976, three new industries are evidently adjoining the subject property.
1989	Since 1983, no apparent change was evident on the subject properties.	Since 1980, no apparent change was evident on adjoining properties.
1994	Since 1989, no apparent change was evident on the subject properties. Timber growth is evident.	Since 1989, the existing industries have expanded and one new facility is evident to the southwest.
2006	Since 1994, no apparent change was evident on the subject properties.	Since 1994, the existing industries continue to grow - one new facility is evident to the south.
2010	Since 2006, no apparent change was evident on the subject properties.	Since 2006, no apparent change was evident on adjoining properties.
2013	Since 2010, no apparent change was evident on the subject properties.	Since 2010, no apparent change was evident on adjoining properties.
2017	Since 2013, some minor thinning of the timber can be seen in the center of the property.	Since 2013, no apparent change was evident on adjoining properties.

Historical Topographic Maps

Historical topographic maps for the subject property were obtained from EDR and file copies. Copies of the topographic maps are included in Appendix 5. A review of the topographic maps is summarized in *Table 5*.

Table 5. Summary of historical topographic maps

Year	Subject Property	Adjoining Properties
1935 (15)	The subject site is located in a rural undeveloped area north of Pine Bluff.	There are several dirt roads indicated around the area. A few houses shown east of the subject property. No commercial development is evident on the map.
1970,1971	Since 1935, no apparent change was evident.	Since 1935, more houses are shown to be developed in Henslee Heights and along Hwy 65 to Pine Bluff. One commercial building is shown to be developed southeast of the subject property.
1975	Since 1970, no apparent change was evident.	Since 1970, further commercial development has taken place southeast and west of the subject property.
1984	Since 1975, no apparent change was evident.	Since 1975, Further commercial development is observed to the east and southwest of the subject property.
2014	Since 1984, no apparent change was evident.	Since 1984, the historical topographic map provided by EDR has omitted structures. Any commercial development since 1984 is not evident on this map.
2017	Since 2014, no apparent change was evident.	Since 2014, the historical topographic map provided by EDR has omitted structures. Any commercial development since 2014 is not evident on this map.

Data gap: Topographic maps were not available for the complete decade series. The 1910s, 1920s, 1940s, 1950s, 1960s, 1990s, and 2000s maps were not provided by EDR. It is the opinion of MCE that these maps would not have provided any relevant information concerning the properties.

Sanborn Fire Insurance Maps

A search for Sanborn maps for the subject property was performed. A copy of the Sanborn Maps Report is included in Appendix 6. A review of the Sanborn Maps is summarized in Table 6 below.

Table 6. Sanborn Maps.

Year	Subject Property	Adjoining Properties
N/A	No maps were available	No maps were available

Due to the rural setting of the subject site, these maps would have provided little if any additional relevant information.

5.6 City Directory Abstract

A City Directory Image Report was provided by EDR. This document includes pages from EDR Digital Archive and Polk City Directory. Between 1988 and 2014, no records were found for the subject property due to it being undeveloped woodlands and only one adjoining property was listed in the report. A review of these records indicated that the adjoining property maintained consistent ownership from 1995 to the time of this writing. No industrial use is indicated on the subject property, however, it is indicated for adjoining properties. These records are included in Appendix 7.

5.7 Historical Use Information on Adjoining Properties

Based on a review of historical aerial photographs, a review of historical topographic maps, and internet searches, it appears that the adjoining properties have been rural/agricultural land with some residences until development took place between 1975 and 1983. In this interval we see commercial businesses being constructed east, south, and west of the property. Commercial business development has continued around the subject property with an industrial wood pellet plant constructed north of the property as recently as 2018.

6.0 Site Reconnaissance

6.1 Methodology and Limiting Conditions

The subject property was observed for REC to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles. The periphery of the subject property and structures were observed and photographs were taken. The boundaries of the subject property were walked and photographed on all sides.

6.2 General Site Setting

The following sections discuss the areas assessed during the site reconnaissance. Photographs are provided in Appendix .

Date of Visit: August 9, 2019

On-Site Personnel: Andrew Miller, P.G.

Current Subject Property Use

Indicators: Unoccupied

Past Subject Property Use

Indicators: Rural

Current Adjoining Property Use

Indicators: Commercial properties N,E,S,W; Rural N,S.

Past Adjoining Property Use

Indicators: Commercial; Rural;

Current or Past Area Use

Indicators: The general area has largely been undeveloped with the exception of electrical transmissions lines on the east part of property.

Site Topography: The general area slopes southwest to northeast.

Structures: No residential structures are present, commercial electric transmission lines are on site.

Roadways: Jefferson Parkway borders the northern perimeter of the property.

Potable Water Supply: Water meter observed on site.

Sewage Disposal System: Sewer system observed on site.

Heating & Cooling System: N/A

Electrical and Gas System: Electricity w/ Propane systems observed

6.3 Exterior Observations

A "No" indicates that the item was not observed on the subject property as indicated in Table 7. Photographs are included in Appendix .

Table 7. Exterior observations

Area of Concern	Yes	No	Comments
Petroleum Products		X	
Pools of Liquid		X	
Stained Soil or Pavement		X	
Stressed Vegetation		X	
Solid Waste		X	
Wooded Areas/Variations of Vegetation	X		Mixed hardwoods and pine, dense brush.
Wastewater System, Septic Systems, or Sumps	X		Owner indicated sewer exists on the property. Was observed.
Storm Drains, Wells (Water, Monitoring, Observation, Injection, or Dry)	X		Owner indicated that there is city drainage bordering the north of the property.
Patched Areas of Asphalt or Concrete		X	
Pits, Ponds or Lagoons		X	
Railroad Spurs		X	
Emergency Generators		X	
Unusual Odors		X	
Landfill, Dumping, Disturbed Soils, Direct Burial Activity		X	
Hydraulic Lifts and Elevators		X	
Transformers or Equipment Suspected as Having PCB-Containing Fluids		X	
Industrial or Manufacturing Activities		X	
Oil or Gas Well Exploration, or Refinery Activities		X	

Area of Concern	Yes	No	Comments
Farm Waste, Feed Lot Spoils or Manure Stockpiles		X	
Prolonged Use, Misapplication or Storage/Disposal of Pesticides/Herbicides		X	
Basements and/or Subsurface Vaults, Etc.		X	
Storage Tanks		X	
Drums		X	
Unidentified Containers		X	
Controlled Substances		X	

6.4 Interior Observations

Interior observations of the property were not warranted due to the undeveloped nature of the subject property.

7.0 Interviews and Correspondence

7.1 Interview with Owner/Occupant

The current owner of the property is The Alliance. The relevant *Owner Questionnaire* may be found in Appendix 3.

7.2 Correspondence with User

A *User Questionnaire* was sent to The Alliance. Ms. Lou Ann Nisbett completed the questionnaire. See Appendix 3 for the completed User Questionnaire and General Information.

- She is unaware of any environmental issues associated with this property,
- She does not know of any environmental cleanups or limitations associated with the property
- She believes the purchase price reflects the fair market value of the property.

7.3 Correspondence with Local Government Officials

A *Local Government Questionnaire* was sent to the Pine Bluff Fire Department. As of this writing, MCE has not been provided a response from the Pine Bluff Fire Department for the *Local Government Questionnaire*.

8.0 Findings

The subject property assessed for this Phase I ESA was a 44.42-acre Tract on Jefferson Parkway in White Hall, AR. The property is currently undeveloped woodland that is not being utilized. The only structures on the property are electrical transmission lines on the eastern section of the property.

The property is owned by and being considered for sale by The Alliance. Significant findings include:

- MCE contacted Ms. Lou Ann Nisbett who acts as user with The Alliance. She was unaware of any environmental issues associated with the subject properties.
- MCE contacted Ms. Nancy Lee McNew, owner of the property with The Alliance. She was unaware of any environmental issues associated with the subject properties.

- Fifteen standard environmental records were listed by the EDR. Of the fifteen records, two were potentially indicative of a REC.
 - 0.295 miles east north-east of the subject property was reported as a SWID. Upon investigation, there was no evidence found to support the claim. It is the opinion of MCE that this site would not constitute as a REC.
 - 0.3566 miles west of the subject property was reported as a LTANKS. A small leak was observed in the fuel lines and was replaced. A LUST case was not opened by ADEQ and ADEQ's records could not provide additional information on the site. It is the opinion of MCE that this site would not constitute as a REC.
- Historical aerial photographs indicate the area has been rural woodland as far back as the 1930s. Development began along AR Highway 65 although it was primarily residential. In the mid-1970's commercial and industrial buildings were developed on the properties adjoining the subject property.
- The data gaps in historical topographic maps were determined not to be significant by the environmental professionals at MCE due to sufficient historical information and professional knowledge of the subject property and vicinity.

9.0 Opinions

It is the opinion of the environmental professionals at MCE, that NO REC was identified in regard to the subject property.

10.0 Conclusions

MCE has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the subject property. Any exceptions to, or deletions from, this practice are described in *Section 11.0* of this report.

NO RECs were identified in regard to the subject properties.

Observations should be made during site modifications for areas of possible contamination, such as but not limited to, the presence of underground facilities, buried debris, stained soil, or odorous soil. Should such materials be encountered, further investigation and analysis may be necessary at that time.

11.0 Deviations

At the discretion of the environmental professionals at MCE, local government officials were contacted through email and telephone rather than in person, to obtain the following standard historical sources:

- Historical Topographic map data failure based on the earliest available date and intervals of greater than ten years was unavailable.
- Fire Insurance Maps data failure based on no maps available.
- No title records were provided as of August 29, 2019.

These data gaps regarding topographic maps, aerial photographs, and fire insurance map data failure were assumed insignificant by the environmental professionals at MCE due to sufficient historical information and local knowledge of the subject properties.

12.0 Additional Services

No additional services are recommended at this time.

13.0 Qualifications of Environmental Professionals

Andrew L Miller, P.G.

Mr. Miller has over 30 years of geology, hydrology, hydraulics, and engineering experience working with consulting engineering and geotechnical companies on a wide variety of projects. He has worked as project geologist and designer on a broad range of projects including: modeling, geotechnical investigations, environmental site assessments, and site cleanup and permitting. He has completed over 140 Phase I Environmental Site Assessments and conducted numerous Phase II/Phase III site assessments and cleanups. He was responsible for QA/QC sample collection and reporting during the Phase II and Phase III projects.

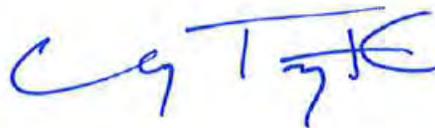

Cody L. Traywick

Mr. Traywick has approximately 10 years of geology, engineering, and exploration experience working with exploration, engineering, and environmental companies as well as regulatory and state agencies. He has worked as a geologist, project manager, inspector, and consultant on a range of projects including: geotechnical investigations, geophysical surveys, exploration, geological mapping, and environmental site assessments. Mr. Traywick has conducted numerous site assessments under the direct supervision of an environmental professional.

14.0 Signatures of Environmental Professionals

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR §321.10 and ASTM E1527-13.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the All Appropriate Inquiries (AAI) in conformance with the standards and practices set forth in 40 CFR Part 312 and ASTM E1527-13.

Andrew L. Miller, P.G., CFM, CSA
Geologist/Designer

Cody L. Traywick
Geologist/Geotechnical Specialist

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/11/2019 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MAUSER USA LLC EPA ID:: ARD075675785	3300 NORTH HUTCHINSON	SE 1/8 - 1/4 (0.159 mi.)	B6	43

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
STANT MANUFACTURING EPA ID:: ARD096674213	5300 JEFFERSON PKWY	E 0 - 1/8 (0.093 mi.)	1	8

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 5 RCRA-CESQG sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F035
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: U228
. Waste name: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

Arkansas Permit Data System (PDS) is a system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1677

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

Arkansas Permit Data System (PDS) is a system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Arkansas Permit Data System (PDS) is a system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Arkansas Permit Data System (PDS) is a system maintaining data on air quality, mining, tires, solid waste, tank, water and hazardous waste, as well as inspections, invoicing and complaints.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Hazardous Waste Summary:

- . Waste code: D001
- . Waste name: IGNITABLE WASTE

- . Waste code: D002
- . Waste name: CORROSIVE WASTE

- . Waste code: D008
- . Waste name: LEAD

- . Waste code: D011
- . Waste name: SILVER

- . Waste code: D035
- . Waste name: METHYL ETHYL KETONE

- . Waste code: F003
- . Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

- . Waste code: F005
- . Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- Amount (Lbs): 15606

- Waste code: D035
- Waste name: METHYL ETHYL KETONE

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: N/A
Date Made Active in Reports: 05/14/2019	Last EDR Contact: 07/02/2019
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/14/2019
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/11/2019

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: 214-665-6444

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: 214-665-6444

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: 214-665-6444

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/04/2019	Telephone: 703-603-0695
Date Made Active in Reports: 03/08/2019	Last EDR Contact: 05/29/2019
Number of Days to Update: 32	Next Scheduled EDR Contact: 09/09/2019
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/17/2018	Source: Environmental Protection Agency

Date Data Arrived at EDR: 04/24/2019	Telephone: 501-683-1552
Date Made Active in Reports: 06/05/2019	Last EDR Contact: 07/23/2019
Number of Days to Update: 42	Next Scheduled EDR Contact: 11/04/2019
	Data Release Frequency: Varies

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/24/2019	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 02/26/2019	Telephone: 202-307-1000

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/11/2019	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 02/12/2019	Telephone: 860-424-3375
Date Made Active in Reports: 03/04/2019	Last EDR Contact: 05/14/2019
Number of Days to Update: 20	Next Scheduled EDR Contact: 08/26/2019

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Target Property Map:	6064693 WHITE HALL, AR
Version Date:	2014
South Map:	6064665 PINE BLUFF, AR
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

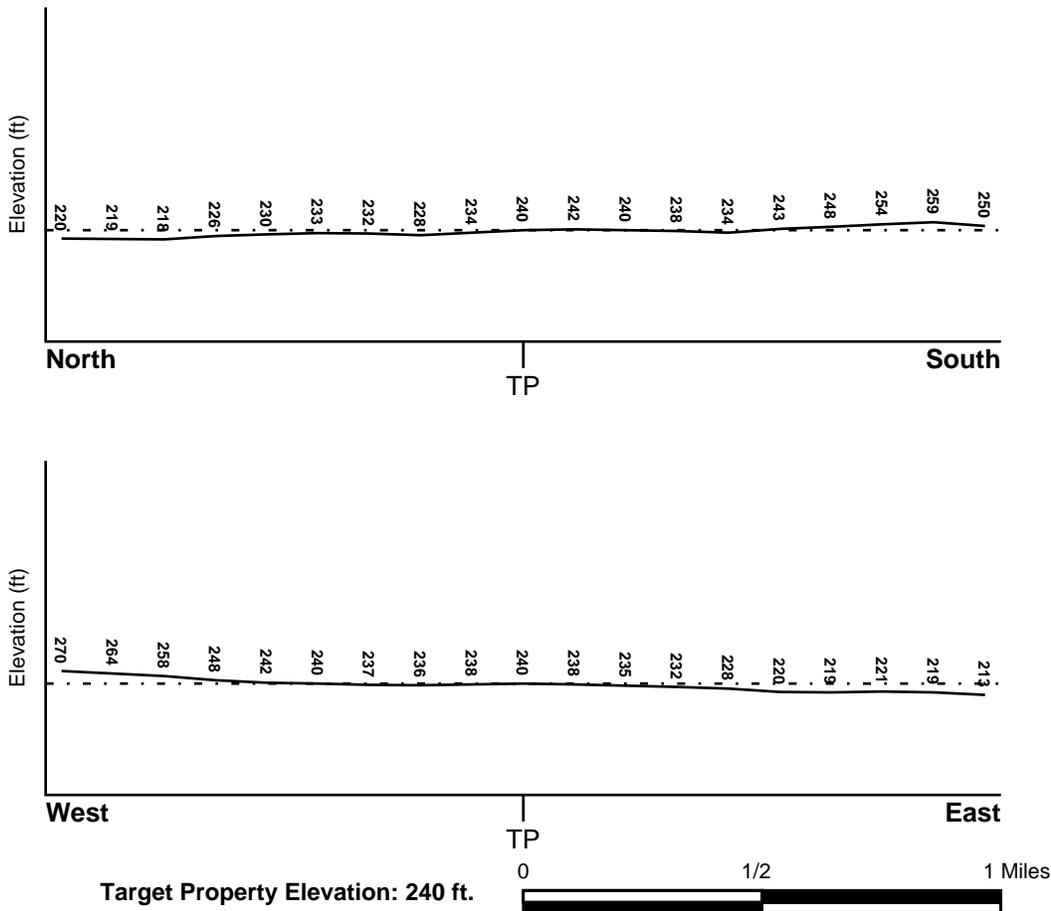

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

05069C0285D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
WHITE HALL	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Calloway

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 6 Min: 4.5
2	37 inches	66 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 6 Min: 4.5
3	66 inches	75 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 6 Min: 4.5
4	5 inches	20 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 6 Min: 4.5

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Are materials ever burned on the property No

How long since excavation on the property None By Whom _____

Why _____

Last time natural features manipulated 6 yrs. ago By Whom Tree cutting service

Why So we could get into the property (cut 10 acres)

Have any previous ESA's been performed No By Whom _____

Why _____

Has there been any previous remediation work None needed By Whom _____

Why _____

QUESTIONNAIRE

1a. Did you observe evidence or do you have any prior knowledge that the **subject property** is currently or has been previously used for an industrial use? YES NO

1b. Did you observe evidence or do you have any prior knowledge that any **adjoining property** is currently or has been previously used for an industrial use? YES NO

2a. Did you observe evidence or do you have any knowledge that the **subject property** is currently or has previously been used for any of the following (circle all that apply): YES NO

- gasoline station
- motor repair facility
- dry cleaners
- photo developing laboratory
- junkyard or landfill
- waste treatment, storage, disposal, processing
- recycling facility

2b. Did you observe evidence or do you have any knowledge that any *adjoining property* is currently or has previously been used for any of the following (circle all that apply):

- gasoline station
- motor repair facility
- dry cleaners
- photo developing laboratory
- junkyard or landfill
- waste treatment, storage, disposal, processing
- recycling facility

YES

NO

3. Did you observe evidence or do you have any knowledge that there are currently or have been previously any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers >5 gallons (19 L) in volume or 50 gallons (190 L) in the aggregate, stored on or used at the *subject property*?

YES

NO

4. Did you observe evidence or do you have any knowledge that there are currently or have been previously any industrial drums (typically 55 gal) or sacks of chemicals located on the *subject property*?

YES

NO

5. Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the *subject property* that originated from a contaminated site or is of unknown origin?

YES

NO

6. Did you observe evidence or do you have any prior knowledge that there is currently or has been previously any pits, ponds, or lagoons located on the *subject property* in connection with waste treatment or waste disposal?

YES

NO

7. Did you observe evidence or do you have any prior knowledge that there is currently or has been previously any stained soil on the *subject property*?

YES

NO

8. Did you observe evidence or do you have any prior knowledge that there is currently or has been previously any registered or unregistered storage tanks (above or underground) located on the *subject property*? YES NO
9. Did you observe evidence or do you have any prior knowledge that there is currently or has been previously any vent pipes, till pipes, or access ways indicating a fill pipe protruding from the ground on the *subject property* or adjacent to any structure on the *subject property*? YES NO
10. Is there currently evidence of leaks, spills, or staining by substances other than water, or foul odors, associated with flooring, drains, walls, ceilings, or exposed grounds on the *subject property*? YES NO UNKNOWN
11. If the *subject property* is served by a private well or non-public water system, is there evidence or do you have any knowledge that contaminants have been identified in the well or system, or that the well has been designated as contaminated by any government environmental health agency? YES NO UNKNOWN
12. Do you have any knowledge of environmental liens or government notification relating to past or recurrent violations of environmental laws with respect to the *subject property*? YES NO
13. Have you been informed of the current or past existence of hazardous substances or petroleum products with respect to the *subject property*? YES NO
14. Do you have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the subject property, or recommended further assessment of the *subject property*? YES NO

15. Do you know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the *subject property* by any owner or occupant of the property? YES NO
16. Does the subject property discharge waste water (not including sanitary waste or storm water) onto or adjacent to the property and/or into a storm water system? YES NO UNKNOWN
17. Do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the *subject property*? YES NO
18. Is there a transformer, capacitor, or any hydraulic equipment on the *subject property* for which there are any records indicating the presence of PCB's? YES NO UNKNOWN

Please provide details relating to any questions answered "yes" in the space provided. Attach additional sheets or informative documents if necessary.

Yes, it is in an industrial park.

The undersigned represents that to the best of his/her knowledge the above statements and facts are true and correct and the best of his/her knowledge no material facts have been suppressed or misstated.

User Questionnaire

MCE Project Number: 19-3806

At the request of Ms. Lou Ann Nisbett with the Economic Development Alliance for Jefferson County, McClelland Consulting Engineers, Inc. (MCE) is conducting a Phase I Environmental Site Assessment for a tract of land consisting of 49.5-acres located on the south side of Jefferson Parkway in Pine Bluff, Arkansas. Attached to this questionnaire is the approximate extent of the Phase I Environmental Site Assessment.

Please answer the following questions to the best of your knowledge. This information is intended to assist the Environmental Professional in the preparation of the Environmental Site Assessment Phase I report for the subject property and to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"). The user must provide the following information (if available) to the Environmental Professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Each CFR below lists the relative items that must be investigated in order to qualify for the LLP defense. Please answer each question to the best of your knowledge. Use additional sheets if necessary.

1. Environment cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local laws?

Yes _____ No (If yes, please explain fully)

2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any activity and use limitations (AULs), such as *engineering controls*, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

Yes _____ No (If yes, please explain fully)

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes _____ No (If yes, please explain fully)

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

Yes No _____

If no, have you considered whether the lower purchase price is because contamination is known or believed to be present on the property? Please explain fully.

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user:

a.) Do you know the past uses of the property?

Yes No _____ (If yes, please explain fully)

Virgin land

b.) Do you know of specific chemicals that are present or once were present at the property?

Yes _____ No (If yes, please explain fully)

c.) Do you know of spills or other chemical releases that have taken place at the property?

Yes _____ No (If yes, please explain fully)

d.) Do you know of any environmental cleanups that have taken place at the property?

Yes No (If yes, please explain fully)

6. The degree of obviousness of the presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Yes No (If yes, please explain fully)

Please complete the following fields:

Name: Nancy Lee McNew

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by McClelland Consulting Engineer were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
