US Fish and Wildlife
Att: Supervisor
646 Cajundome Blvd. Suite 400
Lafayette, LA 70506

This project has been reviewed for effects to Federal trust resources under our jurisdiction and currently protected by the Endangered Species Act of 1973 (Act). The project, as proposed,
() Will have no effect on those resources
() Is not likely to adversely affect those resources.
This finding fulfills the requirements under Section 7(a)(2) of the Act.

Debra A. Fuller *May 7, 2013*

FISH AND WILDLIFE SERVICE

646 Cajundome Blvd.

Suite 400

Lafayette, Louisiana 70506

August 13, 2012

To Whom It May Concern,

The Louisiana Ecological Services Office of the Fish and Wildlife Service is pleased to announce the activation of our new online pre-development self-assessment tool. This new tool will allow project proponents the ability to self-assess their projects for potential impacts to federally listed threatened and endangered species. This online tool will provide instant feedback on whether a project does, or does not, have a potential to affect federally listed species. We believe that you will find this online tool helpful in meeting your environmental clearance needs.

In order to access this online tool, you will need to go to the following website address: <http://www.fws.gov/lafayette>. The environmental clearance application can be accessed by clicking on the yellow button entitled "Endangered Species Act (ESA) and Migratory Birds Treaty Act (MBTA) Project Review". This tool will query certain aspects about your proposed project so that you, acting as the representative for the Federal Action Agency, can render a decision on whether the project will result in a "No Effect" determination under the ESA or whether you will need to consult further with our office. If you determine through this process that the project has no effect on federally listed species, no further coordination with this office is required, and you will be given the option to generate an official pre-development document that records your "No Effect" determination. We recommend that you generate a report for your records. Although it is not required, you may also submit this report to our office. Providing our office with the report will allow us to document the ESA coordination should further inquiries ensue.

In addition to providing guidance on ESA coordination, the self-assessment tool provides MBTA guidance for cell tower projects. Because of the ephemeral nature of colonial nesting wading birds and shorebirds, we are not able to provide online clearance on those taxa. However, our website does provide suggested buffer distances should nesting colonies be encountered in the vicinity of the project area. A link is also provided to offer additional instructions in determining disturbance to nesting bald eagles. That information is found on our webpage under Migratory Birds or through the environmental clearance application.

We hope that you find this new online guidance helpful with your project planning and permitting needs. If you have any questions or comments regarding our website features, please contact Ms. Amy Trahan of this office at 337-291-3126.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. Weller', with a long horizontal flourish extending to the right.

Jeffrey D. Weller
