Re. Britco Site Railroad Spur Construction Estimate
CSRS Job No. 213084.

Dear Mr. Cavanaugh:

A proposed cost estimate is outlined below for the construction of a railroad spur to access the Britco Site in Ascension Parish, Louisiana. The proposed rail spur will connect directly to an existing Kansas City Southern Rail Line to service the Britco site. The construction cost of a railroad spur, which includes labor, materials (switches, frogs, ballast, and track), and fill is estimated to be \$250 per linear foot (L.F). The total track length of the proposed spur is approximately 1,000 L.F yielding a total estimated construction cost of \$250,000.

Please note this estimate does not include engineering, required rights of way, environmental impacts, or operation and maintenance costs. This cost estimate was prepared with the best information available at the time of certification. The actual costs can vary based on the availability of material, site conditions and labor availability. This plan can be executed within a reasonable timetable of 180 days or less based on preliminary engineering judgment and Kansas City Southern Railroad construction guidelines.

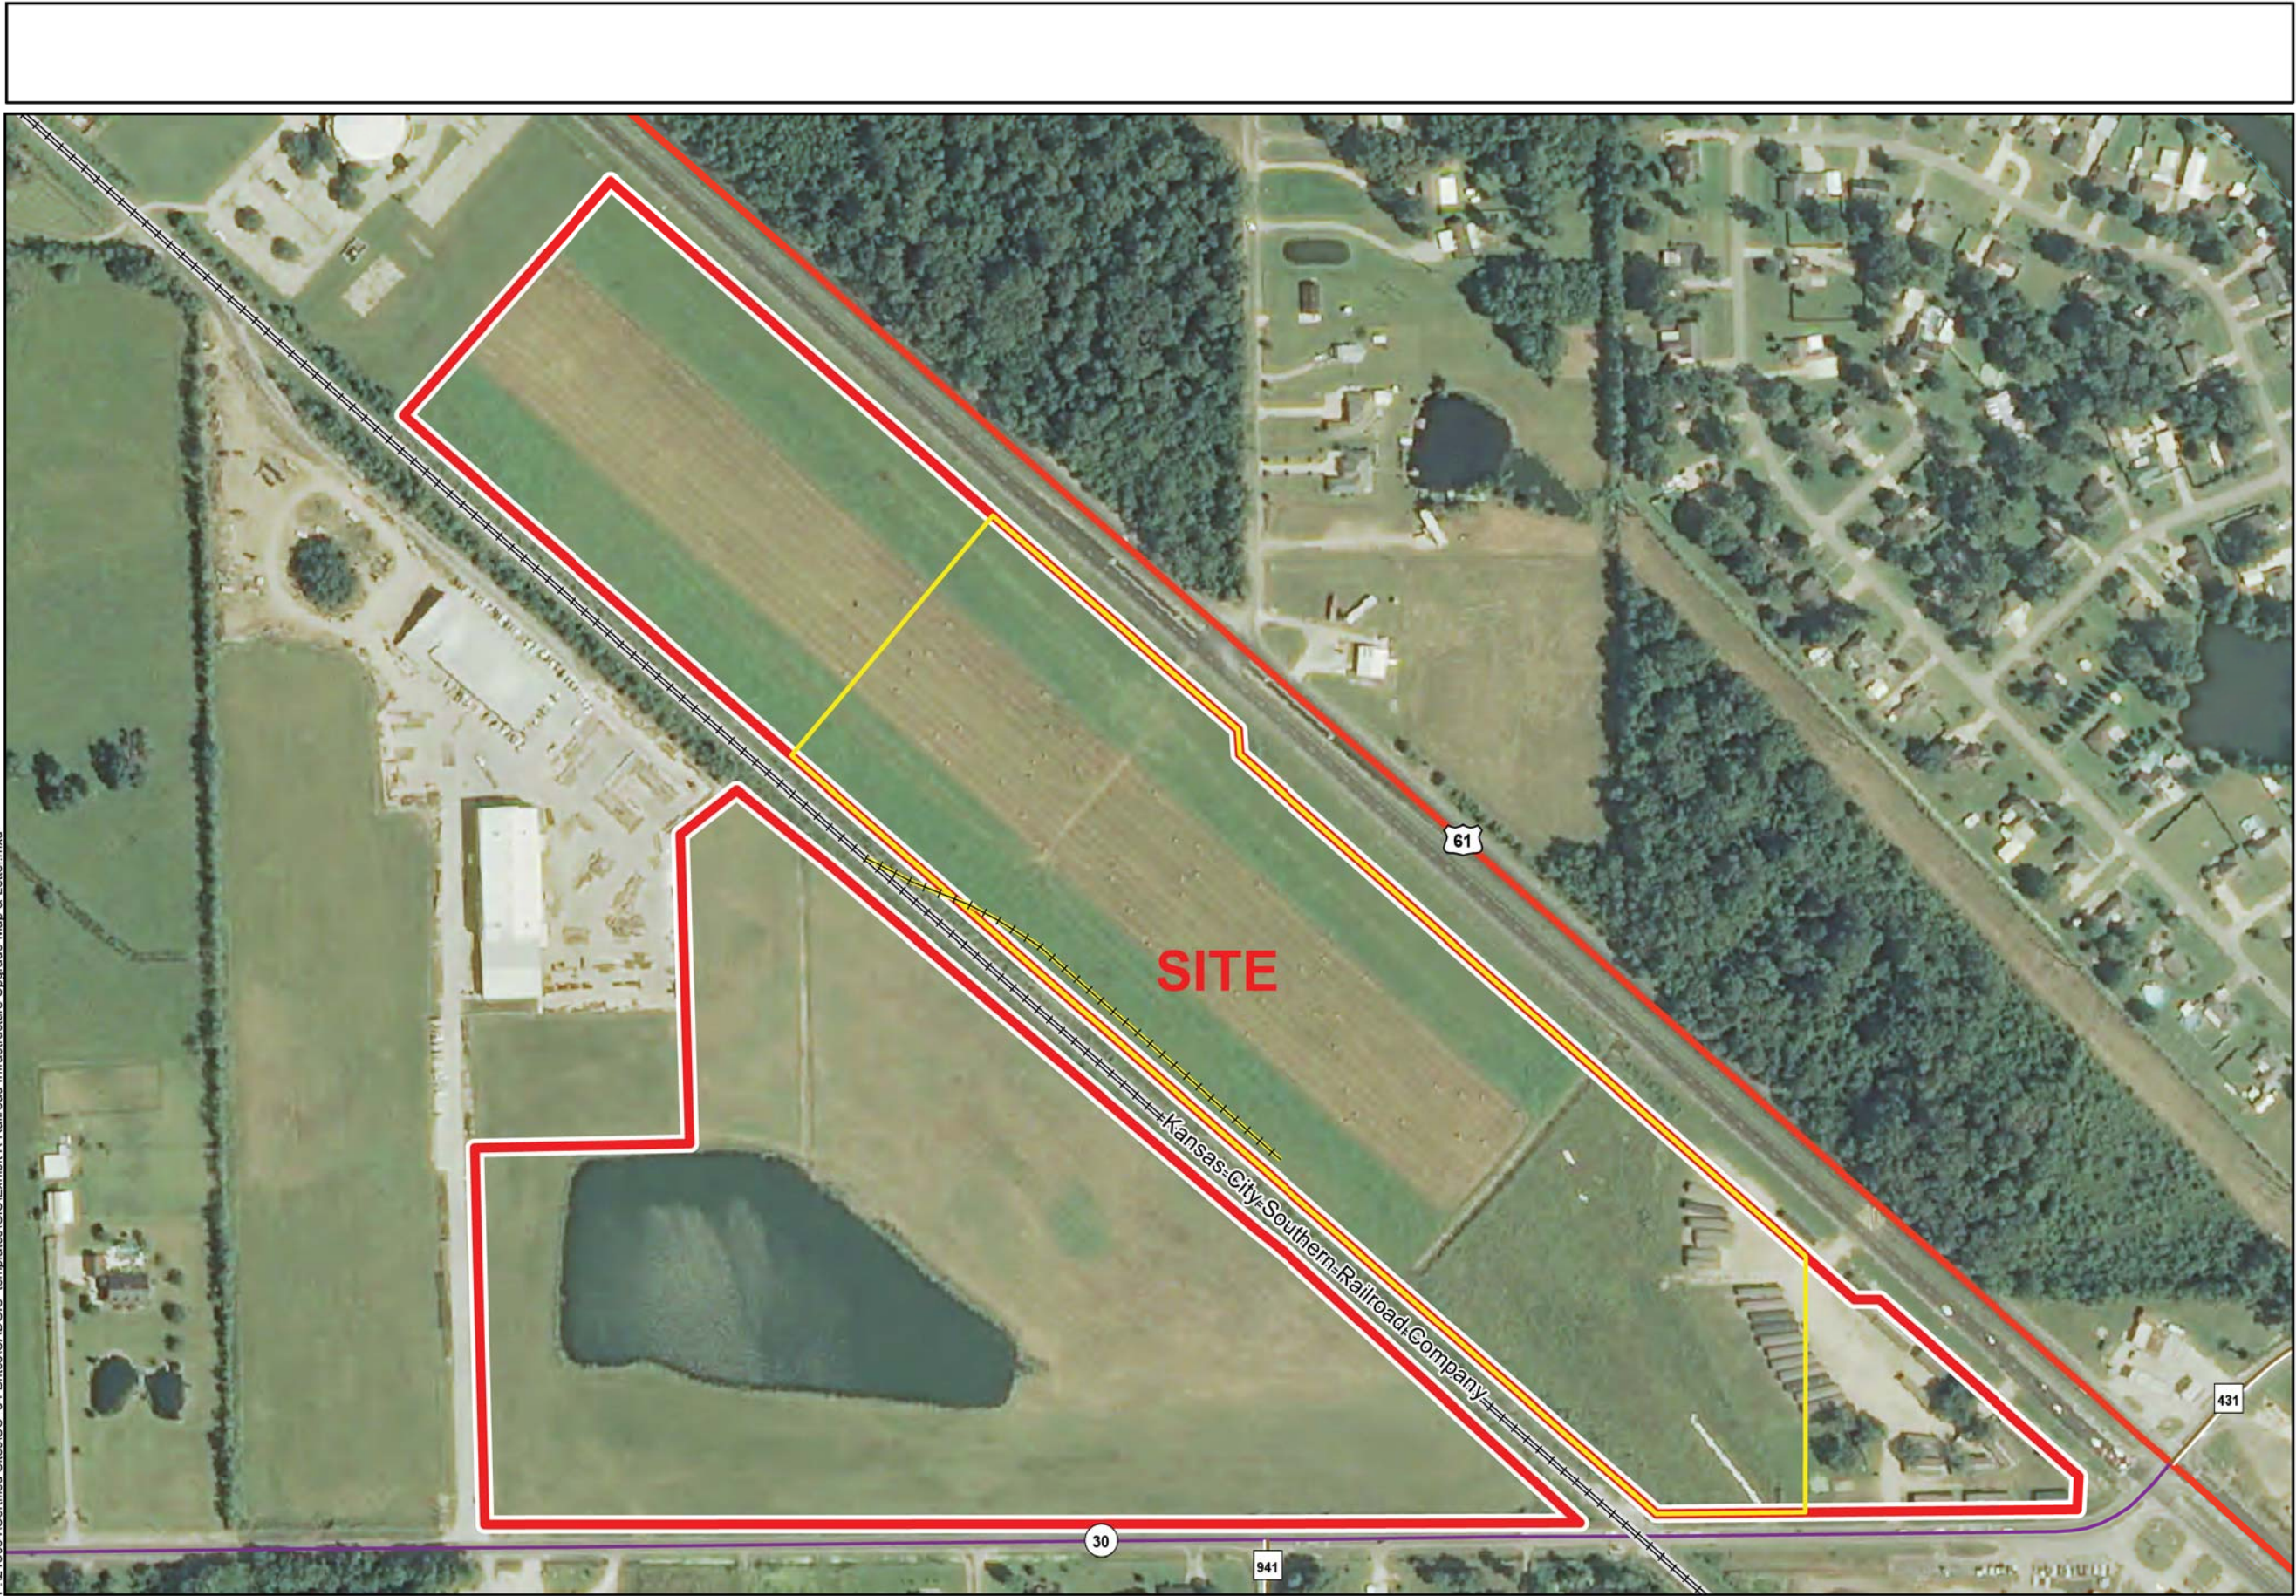

Thank you for the opportunity to assist you in this project. Should you have any questions or require additional information, feel free to contact me.

Sincerely,

CSRS, Inc.

Taylor M. Gravois, PE, PLS
