Executive Summary

Manchac Consulting Group, Inc. conducted a Phase I Environmental Site Assessment (ESA) of the existing North Infield property owned by the Baton Rouge Metropolitan Airport. A portion of the North Infield has been proposed for a new manufacturing facility. The Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Practice 1527-00. This ESA did not include an assessment of non-scope considerations as listed in ASTM designation E-1527-00, such as lead-based paint, wetlands, radon, asbestos or regulatory compliance.

A summary of findings, recommendations and potential environmental lists are as follows:

- Environmental Data Resources, Inc. (EDR) Radius Map with GeoCheck Environmental Database Search did not identify any recognized environmental concerns (REC) at the site. State, Federal and Federal Supplemental database searches indicated a Formally Used Defense Site (FUDS) property within a 1/8 – 1/4 mile radius where the US Army Corp of Engineers is actively working or will take necessary clean up actions. Manchac Consulting Group, Inc. does not consider the database information to represent a significant environmental concern.

- There were no RECs observed during the site reconnaissance.

Section 1

Introduction

A Phase I Environmental Site Assessment (ESA) was conducted at the existing North Infield property owned by the Baton Rouge Metropolitan Airport. The Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Practice 1527-00. This ESA did not include an assessment of non-scope considerations as listed in ASTM designation E-1527-00, such as lead-based paint, wetlands, radon, asbestos, or regulatory compliance. The results of this ESA are based on:

- Information obtained through interviews with property management personnel.
- A walkthrough of the subject property.
- A review of the federal and state environmental databases.

On July 26, 2010, the Baton Rouge Airport authorized Manchac Consulting Group, Inc. to perform the ESA. On July 27, 2010, Chris LaCroix with Manchac Consulting Group, Inc., met with Mr. Ralph Hennessy, Assistant Director of Aviation for the Baton Rouge Airport, to discuss the details of the subject property's assessment, conduct the personnel interview and to visit the subject property. At this time, aerial photographs of the north end of the airport were provided to Manchac Consulting Group, Inc. Observations made by Manchac Consulting Group, Inc. during the site visit were noted and are later reported.

A search of state and federal environmental databases was conducted by Environmental Data Resources, Inc. (EDR) to obtain information regarding any past or current hazardous waste disposal sites, reported petroleum or hazardous waste releases, listed hazardous waste generation, transportation, storage, or disposal facilities, listed solid waste facilities and other issues related to reported environmental contamination problems. **Appendix A** presents the results in the database search.

This report has been prepared by Manchac Consulting Group, Inc. for the exclusive use of the Baton Rouge Metropolitan Airport. Use of this report by any other party is at their sole risk.

Section 2

Site Description and History

The subject area is located in Baton Rouge, Louisiana. **Figure 2-1** presents a site location map of the subject area.

2.1 Site Description

The roughly 125 acre subject property is owned by the Baton Rouge Metropolitan Airport. The site is bound in the north by a drainage ditch known as the North Lateral (**Photo 3** in **Appendix B**), in the southwest by Runway 13/31, and in the southeast by Runway 04R/22L. A drainage ditch is located parallel to Runway 04R/22L and discharges into the North Lateral. The BTR Airport is currently excavating portions of the North Lateral to improve drainage in the area.

The property consists of maintained grass field with some asphalt paving for a perimeter access drive connecting the northern edges of the runways and additional asphalt paving to the old radar tower located near the center of the subject property.

2.2 Vicinity Characteristics

The surrounding vicinity is primarily an industrial and commercial use area. There is minimal residential use in the area as the result of a recent noise mitigation program in which the BTR Airport purchased a majority of the property in the area. Northwest of the subject property is a heavy industrial site consisting of mainly tank farms.

2.3 Site History—Historical Topographic Maps and Aerial Photographs

To investigate site history, historical topographic maps of the area were reviewed. In addition, EDR (the database service) searched for aerial photos and Sanborn fire.

EDR provided topographical maps for the subject property's area dated 1906 (Bayou Sara), 1963 (Zachary), 1963 (Scotlandville), 1970, 1980, 1994, and 1995 (Scotlandville). The topographical maps are of the Quadrangle Targets from the United States Geological Survey (USGS) and are included in **Appendix A**.

The 1906 topographic map, which has a scale of 1:125,000, covers Baton Rouge as well as part of East Feliciana Parish. There is no development on the subject property on this map and minimal residential development in the area.

In the 1963 topographic maps show the designated areas of the BTR Airport.

In the 1970 topographic map, indicates increased residential development in the area with a new trailer park development but still no development on the subject property.

The 1980 topographic map reflects the approximate 1,000-foot expansion of the Runway 04R/22L.

The 1994 topographic map reflects the approximate 1,200-foot expansion of Runway 13/31.

SITE LOCATION MAP

FIGURE 2-1

Between 1980 and 1994 indicates increased residential development in the area with a new trailer park development near the trailer park identified in the 1970 topography map, but still no development on the subject property.

2.3.1 Prior Reports

This environmental assessment was done without the use of a previous assessment for this property. A Site Inspection Report for Harding Field conducted by the U.S. Army Corp of Engineers was made available for review. This report is a site investigation to determine whether Harding Field in East Baton Rouge Parish, Louisiana warrants further evaluation under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) beyond the site investigation stage. Based on the results of the report, no significant risks to human health or the environment resulting from munitions and explosives of concern or munitions constituents are present because the subject property is located outside the old Triple Position Skeet, Pistol, and Firing-in-Butt Ranges.

2.4 Processes

At the present time, no activities are performed on the subject property.

Section 3

Physiography, Geology and Hydrology

The subject property is located in East Baton Rouge Parish, Louisiana which is located in the southeastern portion of the state. Rainfall in the parish is approximately 61.47 inches per year.

The elevation of the subject property is approximately 67 feet above mean sea level. Elevation profiles of the surrounding topography were provided from the 7.5 Foot Digital Elevation Model. The east-west profile indicates that there is higher ground in the area however the target property is not the lowest in the immediate area. The north-south profile indicates that the target property has surrounding sites with lower elevations on each side. Surface water will seek the lower elevations and will generally not settle on the subject property. As discussed in Section 2, two drainage ditches were observed along the subject property. From these observations, surface water on the subject property should drain properly.

According to the EDR Overview Map, portions the subject property lie within the 100-year flood plain.

The nearest water surface body is the North Lateral.

The surface soil near the subject property consists of Quaternary sediments. The dominant soil composition has a silt loam surface texture, which tend to be clayey and have very slow infiltration rates. Sub-surface soil, 10"-34", have a silty clay loam texture, while soil 34"-80" below the surface have a silt loam texture. According to Soil Conservation Service data, the area surrounding the subject property may have soil textures and surficial soil types that contain very fine sandy loam textures, with deeper soil compositions of silty clay loam, as well as very fine sandy loam.

According to EDR, there is one (1) public water supply (PWS) well within a 1-mile radius WSW of the subject property. This well is owned by the Baton Rouge Water Company. There are thirteen (13) registered Federal USGS Wells within a 1-mile radius. **Table 3-1** summarizes the information available for the registered wells and information system.

Table 3-1**Summary of Identified Registered Water Wells**

Well ID	Distance from property	Site Name	Total Depth (ft)
1033005053	1/2 – 1 mile	BR Metro Airport Well	1374
LA1033005	1/2 – 1 mile	BR Water Company	N/A
USGS2493100	1/2 – 1 mile	EB-652	1345

USGS2492992	1/2 – 1 mile	EB-165	950
USGS2492991	1/2 – 1 mile	EB-164	1791
USGS2493092	1/2 – 1 mile	EB-171	1389
USGS2493090	1/2 – 1 mile	EB-996	1374
USGS2493096	1/2 – 1 mile	EB-176	336
USGS2493115	1/2 – 1 mile	EB-375	1400
USGS2493089	1/2 – 1 mile	EB-288	302
USGS2493084	1/2 – 1 mile	EB-170	1382
USGS2493070	1/2 – 1 mile	EB-1091	36
USGS2493057	1/2 – 1 mile	EB-373	1370
USGS2493052	1/2 – 1 mile	EB-344	385

Section 4

Environmental Conditions

As discussed in Section 2, the subject property consists of open land maintained grass field with a private asphalt perimeter access road connecting the two runways. This section provides a discussion of the environmental conditions at the subject property as observed on the site walk-through performed on July 27, 2010.

4.1 Hazardous and Non-Hazardous Chemicals and Substances

During the site investigation, Manchac Consulting Group, Inc. did not observe any evidence of hazardous or non-hazardous chemicals being stored or disposed of on the premises.

4.2 Hazardous Waste

Manchac Consulting Group, Inc. did not observe any hazardous waste on the subject property and there was no evidence that hazardous waste had been stored on, disposed of or released to the premises. The state hazardous waste sites (SHWS) database indicated that the subject property area does not contain any hazardous waste sites within the ASTM search radius.

4.3 Non-Hazardous Solid Waste

Manchac Consulting Group, Inc. did not observe non-hazardous solid waste on the subject property. The subject property management appears to properly collect and dispose of its non-hazardous waste in a sound manner.

4.4 Aboveground Storage Tanks (ASTs) and Underground Storage Tanks (USTs)

Manchac Consulting Group, Inc. did not observe any ASTs or USTs during the walkthrough inspection of the subject property.

4.5 Potable Water

The subject property does not require any potable water service. Water wells reported are discussed in Section 3.

4.6 Wastewater

The subject property does not require any wastewater service in its current state. Sewer manholes (**Photo 4** in **Appendix B**) were located on site near the North Lateral indicating the availability of sewer service in the area. There are no service laterals connected to the sewer line on site.

4.7 Stormwater

The subject property is currently covered under the Baton Rouge Metropolitan Airport Stormwater Pollution Prevention Plan (SWPPP).

4.8 Utility Pipelines

Manchac Consulting Group, Inc. observed a Marathon Petroleum Pipeline running near and parallel to the North Lateral. There are no reported problems with the pipeline on record.

4.9 Herbicides and Pesticides

Manchac Consulting Group, Inc. did not observe any herbicides or pesticides on the subject property during the site investigation. Manchac Consulting Group, Inc. also did not identify any recognized environmental conditions related to herbicide or pesticide use.

4.10 Polychlorinated Biphenyl (PCB) Transformers

There were no pole or slab mounted transformers observed during the site visit.

Section 5

Environmental Records Review

5.1 Databases Searched

A search of available environmental regulatory agency databases was conducted for the subject property and adjacent properties. The database search was conducted by Environmental Data Resources (EDR) to determine whether documentation exists related to environmental incidents at the subject property or at properties in the vicinity of the subject property (**Appendix A**). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E-1527-00. The search distances used to generate the report are per ASTM standards. **Table 5-1** summarizes the databases and search distances from the subject property used to perform the review.

5.2 Database Search Results

The complete database search results are provided as **Appendix A**.

5.2.1 Resource Conservation and Recovery Act (RCRA) Conditionally Exempt Small Quantity Generators (CESQG)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally Exempt Small Quantity Generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

EDR reporting reflects that there we no RCRA-CESQG near the subject property.

5.2.2 Formally Used Defense Sites (FUDS)

The FUDS database contains the list of Formally Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary clean up actions. The former Harding Army Airfield is a FUDS site located within ½ mile of the subject property and consisted of 13,684 acres. The Army divided the land into three parcels; one parcel was comprised of 127.0 acres and contained the airfield, known as Harding Field (now the Baton Rouge Metropolitan Airport). Another parcel was designated as an ordnance magazine area, situated approximately 1.5 miles north of the airfield and was comprised of 665 acres. The third parcel adjacent to the airfield was a training area and consisted of the remaining 11 acres of free land. Approximately 11,607 leased acres were used for a gunnery target range. Approximately 21 acres of leased land was used as a radio range site, situated approximately 3 miles north of the airfield. Improvements on the property consisted of complete air training facilities (approximately 300 assorted structures), which included housing and support facilities for servicemen. Of the 300 structures placed on the site, 12 structures remain along with numerous concrete slabs. By Letters of Acceptance from the Governor of the State of Louisiana, between 15 January 1943 and 25 August 1944, the War Assets Administration (WAA) acquired the acreage and was granted jurisdiction over the leased and easement acreage.

A Site Inspection Report for Harding Field conducted by the U.S. Army Corp of Engineers was made available for review. This report is a site investigation to determine whether Harding Field in East Baton Rouge Parish, Louisiana warrants further evaluation under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) beyond the site investigation stage. This report indicates that there is no risk to the subject property from this FUDS site.

Section 6

Findings, Conclusions and Recommendations

Manchac Consulting Group, Inc. conducted a Phase I Environmental Site Assessment (ESA) of the existing North Infield property owned by the Baton Rouge Metropolitan Airport. A portion of the North Infield has been proposed for a new manufacturing facility. The site is bound in the north by a drainage ditch known as the North Lateral, in the southwest by Runway 13/31, and in the southeast by Runway 04R/22L. The property consists of maintained grass field with some asphalt paving for a perimeter access drive connecting the northern edges of the runways and additional asphalt paving to the old radar tower located near the center of the subject property. At the time of the site investigation, Manchac Consulting Group, Inc. was told that site would potentially be developed with a new manufacturing facility. The Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Practice 1527-00. This ESA did not include an assessment of non-scope considerations as listed in ASTM designation E-1527-00, such as lead-based paint, wetlands, radon, asbestos, or regulatory compliance.

A summary of findings, recommendations and potential environmental lists are as follows:

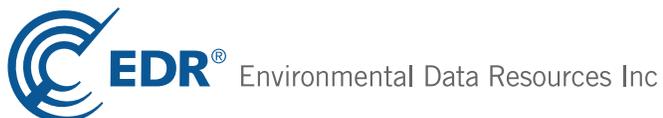

- Environmental Data Resources, Inc. (EDR) Radius Map with GeoCheck Environmental Database Search did not identify any recognized environmental concerns (REC) at the site. State, Federal and Federal Supplemental database searches indicated a Formally Used Defense Site (FUDS) property within a 1/8 – 1/4 mile radius where the US Army Corp of Engineers is actively working or will take necessary clean up actions. Manchac Consulting Group, Inc. does not consider the database information to represent a significant environmental concern.

- There were no RECs observed during the site reconnaissance.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 12/31/2008 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

Off-site waste receiver: Verified to be non-commercial

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

FUDS Description Details:

The Harding Army Airfield consisted of 13,684 acres. This site is located in East Baton Rouge Parish, six miles north of Baton Rouge, Louisiana. The Army divided the fee-owned land into three parcels, one parcel, was comprised of 127.0 acres and contained the airfield, known as Harding Field (now the Baton Rouge Municipal Airport, Ryan Field). Another parcel was designated as an ordnance magazine area, situated approximately 1.5 mile north of the airfield and was comprised of 665 acres. The third parcel adjacent to the airfield, was a training area and consisted of the remaining 11 acres of fee land. Approximately 11,607 leased acres were used for a gunnery target range. Approximately 21 acres of leased land was used as a radio range site, situated approximately 3 miles north of the airfield. Improvements on the property consisted of complete air training facilities (approximately 300 assorted structures), which included housing and support facilities for servicemen. Of the 300 structures placed on the site, 12 structures remain along with numerous concrete slabs.

FUDS History Details:

This property consists of approximately 13,684 acres of land. By Letters of Acceptance from the Governor of the State of Louisiana, between 15 January 1943 and 25 August 1944, the War Assets Administration (WAA) acquired the fee acreage and was granted jurisdiction over the leased and easement acreage. The fee-owned property land was divided into three parcels. One parcel (127.0 acres) contained the airfield, known as Harding Field and is now the Baton Rouge Municipal Airport (Ryan Field). This parcel also included civilian war housing and target butts. Another parcel, situated 1.5 miles north of the airfield, was designated as an ordnance storage magazine area and contained 665 acres. The third parcel, immediately adjacent to the airfield, was an additional training and civilian war housing area, which was comprised of the remaining 11 fee acres. Approximately 21 acres of leased property was used as a radio range site, situated in a remote location approximately 3 miles north of the airfield. Approximately 11,607 leased acres were used for the gunnery target range. The remaining 1,253 acres of leased property comprised of road and aviation easements. The Harding Army Air Field was used as a fighter aircraft training facility during World War II. The presence of an ordnance magazine area at this site, suggests that the airfield had an ordnance capability and may have received, stored and issued ordnance in connection with its mission. The installation was declared surplus by the War Department and custody was assumed by the WAA. The WAA turned the installation over to the Police Jury of East Baton Rouge Parish in 1948. Improvements on the property consisted of complete air training facilities (approximately 300 assorted structures), which included housing and support facilities. Of the 300 structures placed on the site, only 12 structures remain along with numerous concrete slabs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2010	Source: EPA

	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2010	Source: EPA
Date Data Arrived at EDR: 02/09/2010	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/20/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/20/2010	Telephone: 703-603-0695
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 06/14/2010
Number of Days to Update: 82	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/20/2009	Source: Environmental Protection Agency

	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Potential and Confirmed Sites List

Confirmed status denotes that assessments have been performed and a determination made that (1) hazardous waste(s) or substance(s) are present at the site and (2) these sites are under the jurisdiction of the LDEQ/RSD. Potential status is an indicator that sites are either waiting to be assessed or the assessment is in progress.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Elevation:	67 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	30091-E2 SCOTLANDVILLE, LA
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

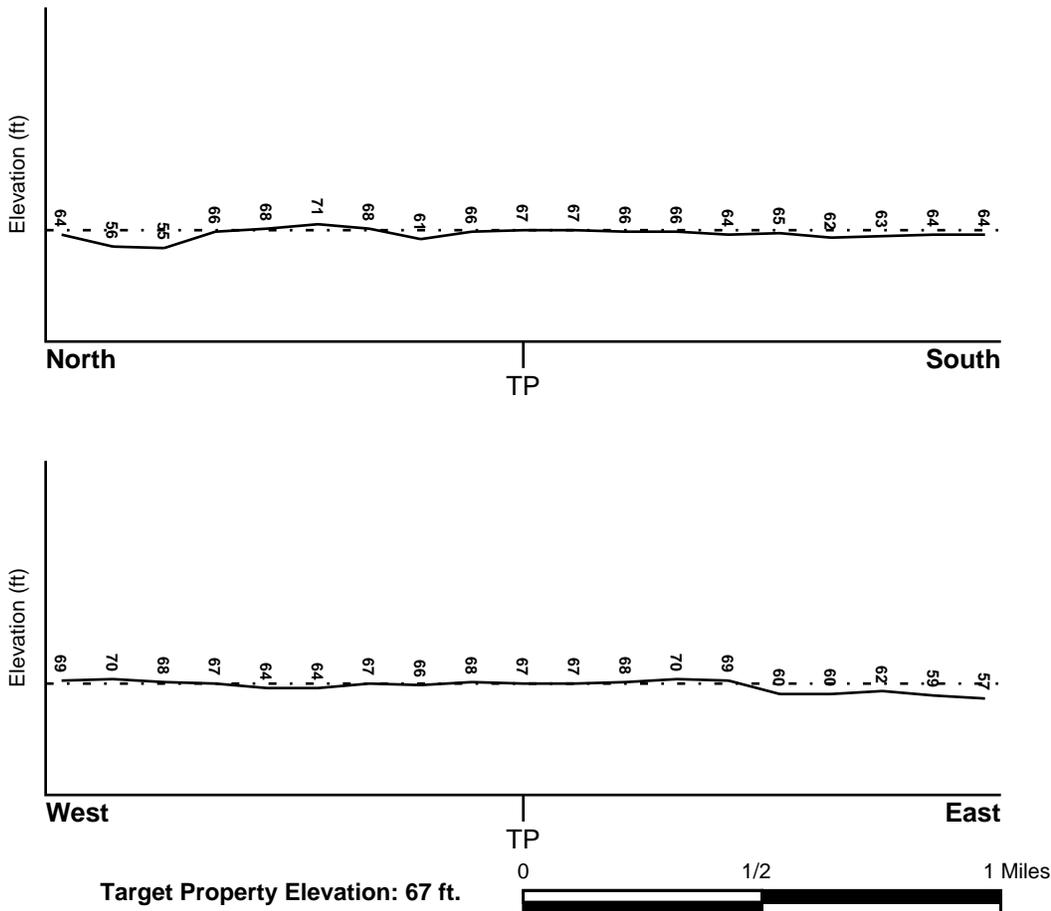

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> EAST BATON ROUGE, LA	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	22033C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> ZACHARY	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Pleistocene
Code: Qp *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: DEERFORD

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	10 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 6.50 Min: 4.50
2	10 inches	34 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.20 Min: 0.06	Max: 8.40 Min: 4.50
3	34 inches	80 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.60 Min: 0.20	Max: 8.40 Min: 6.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: very fine sandy loam

Surficial Soil Types: very fine sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: silty clay loam
very fine sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

FED USGS USGS2493100

Agency cd:	USGS	Site no:	303154091083901
Site name:	EB- 652		
Latitude:	303154	EDR Site id:	USGS2493100
Longitude:	0910839	Dec lat:	30.53185533
Dec lon:	-91.14427331	Coor meth:	M
Coor accr:	S	Latlong datum:	NAD27
Dec latlong datum:	NAD83	District:	22
State:	22	County:	033
Country:	US	Land net:	S 90T 6S R 1E
Location map:	SCOTLANDVILLE 150C	Map scale:	24000
Altitude:	68.00		
Altitude method:	Interpolated from topographic map		
Altitude accuracy:	5.		
Altitude datum:	National Geodetic Vertical Datum of 1929		
Hydrologic:	Amite. Louisiana, Mississippi. Area = 1890 sq.mi.		
Topographic:	Flat surface		
Site type:	Ground-water other than Spring	Date construction:	Not Reported
Date inventoried:	Not Reported	Mean greenwich time offset:	CST
Local standard time flag:	Y		
Type of ground water site:	Single well, other than collector or Ranney type		
Aquifer Type:	Not Reported		
Aquifer:	1500-FOOT SAND OF BATON ROUGE AREA		
Well depth:	1345	Hole depth:	Not Reported
Source of depth data:	Not Reported		
Project number:	Not Reported		
Real time data flag:	0	Daily flow data begin date:	0000-00-00
Daily flow data end date:	0000-00-00	Daily flow data count:	0
Peak flow data begin date:	0000-00-00	Peak flow data end date:	0000-00-00
Peak flow data count:	0	Water quality data begin date:	0000-00-00
Water quality data end date:	0000-00-00	Water quality data count:	0
Ground water data begin date:	1958-04-29	Ground water data end date:	1991-01-18
Ground water data count:	700		

Ground-water levels, Number of Measurements: 700

Dec latlong datum:	NAD83	District:	22
State:	22	County:	033
Country:	US	Land net:	S 97T 6S R 1E
Location map:	SCOTLANDVILLE 150C	Map scale:	24000
Altitude:	65.00		
Altitude method:	Interpolated from topographic map		
Altitude accuracy:	5.		
Altitude datum:	National Geodetic Vertical Datum of 1929		
Hydrologic:	Amite. Louisiana, Mississippi. Area = 1890 sq.mi.		
Topographic:	Flat surface		
Site type:	Ground-water other than Spring	Date construction:	19471107
Date inventoried:	Not Reported	Mean greenwich time offset:	CST
Local standard time flag:	Y		
Type of ground water site:	Single well, other than collector or Ranney type		
Aquifer Type:	Not Reported		
Aquifer:	400-FOOT SAND OF BATON ROUGE AREA		
Well depth:	330	Hole depth:	331
Source of depth data:	Not Reported		
Project number:	Not Reported

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Radon Levels

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.
